@ The Houston Design Center

Jamie House/Jamie House Design

“The Houston Design Center is JHD's go to resource for providing our clients with the most exclusive luxury brands. The variety of showrooms allow us to make selections and receive expert advice throughout all phases of our projects. Regardless of the stresses of a project, the showrooms always provide excellent individual customer service almost unheard of today. The HDC is an invaluable tool for providing great service and quality products to our clients.”

# Jamie House Jamie House Design

*Jamie House graduated from Texas Tech with a Bachelors of Interior Design and a minor in Architecture. After working for some of the best designers in Texas, she officially opened Jamie House Design in 2013. Designing award winning homes for more than thirteen years, she has developed a style rooted in architecture, fine details, and personalized service. Her strengths are her confident approach to construction, affinity for modern design elements, and decidedly casual vibe.*

*Jamie's signature style can be attributed to her ability to listen to a room. She feels each room will almost always tell you the appropriate design direction to take if one pays attention. That, combined with an almost sixth sense for determining a client's style has lead to an impressive roster of residential clients here and abroad.*

*And yes, her last name is actually House.*
